Ben Arous, Tunisia

Software engineering student (degree expected October 2027) with full-stack experience on healthcare, education and research-management platforms, and a growing interest in AI and cloud. Has shipped production features on **Angular/Spring Boot** and **React/TypeScript**. **2nd at LunarHack 1.0**, 5th at MenaCraft, top 10 at LunarHack 2.0; certified **AWS Cloud** and **AI Practitioner**.

PROFESSIONAL EXPERIENCE

Software Engineer Intern | ***EspritTech*** | **Tunis, Tunisia** June – Aug. 2026

Intelligent platform for managing and industrializing academic projects (Scrum/Agile)

- **Real-time notifications** (Spring STOMP/WebSocket + **Angular**): JWT handshake, pagination, mark-as-read and bell icon, integrated into the affiliation, project and evaluation workflows.
- Designed an **AOP-based audit log module** across the entity, repository, service and controller layers, with a history timeline in the UI, a user guide and comprehensive unit tests.
- Built a **team management module** (CRUD, roles, request approval, advanced filtering) with **100% test coverage** on key services (JUnit 5, Mockito).
- Strengthened the **CI/CD GitLab** pipeline across 3 repositories (Angular, Spring Boot, ML microservice): **Docker** images, local Docker-outside-Docker runners and quality checks with **SonarQube**; fixed critical **XSRF**, **JWT/Swagger** and **Hibernate** bugs.

Full-Stack Developer Intern | ***TACHAFY*** | **Tunis, Tunisia / Lyon, France** June – Aug. 2025

AI-driven healthcare startup

- Front-end features for a healthcare and medical marketplace platform (teleconsultation, diagnostics, e-pharmacy) using **React.js (Material UI)** and **TypeScript**, integrated with **FastAPI** and **PostgreSQL**; **AI chatbot**.
- Implemented the **cart and checkout** (partner ordering rules, pre-filling, protection against double submission) with **Stripe**, improving reliability; bulk product import from Excel/ZIP.
- Overhauled a large admin dashboard (lazy loading per tab), fixed doctor pagination/search and unified the phone input component across 6+ forms.

PROJECTS

GL5 Student Platform: Microservices and CI/CD Final-year project

- Designed an **pipeline CI/CD Jenkins** for a monorepo of six services built with **Spring Boot + Angular**: git-diff change detection, parallel build/test/Sonar/Docker stages, quality gates and versioned publishing to **Nexus**.
- Jenkins/Nexus/Sonar stack defined as code with **Docker Compose** and Jenkins Configuration as Code; service integration via **OpenFeign** and DTOs; hardened **JWT** validation on the API gateway.

PFEX – Final-Year Project Management Platform Sept. – May 2025

- Co-designed a full-stack platform managing **360+** final-year project topics per year: submission, validation, supervision and tracking. Built with **Next.js (Material UI)**, **Node.js** and **PostgreSQL**.

NotiShop – Multi-Vendor E-Commerce Platform Jan. – May 2024

- Backend, supplier analytics dashboard, promotions and cart/favorites synchronization with **React 19**, **Express**, **Supabase (PostgreSQL)**, **Stripe** and Firebase push notifications.

SOFTECH – School Management Platform Sept. – Jan. 2024

- School management platform (students, courses, grades, timetables, payments) built with **React.js (Tailwind CSS)**, **PHP** and **MySQL**.

HACKATHONS

LunarHack 1.0 – 2nd Place 2025

- Designed **Campus Compass**, an AI-assisted campus navigation and lost-and-found system. **Stack:** React (Vite), Flask, SQLAlchemy, BLIP for image captioning and sentence-embedding similarity search.

MenaCraft Hackathon – 5th Place 2026

- Developed **Detectify**, an AI system that detects manipulated or AI-generated content and verifies context and sources with an explainable **confidence score**. **Stack:** FastAPI, React (Vite), PyTorch, Transformers/CLIP, Gemini API, Chrome extension.

LunarHack 2.0 – Top 10 2026

- AI-driven platform helping traditional SMEs become intelligent businesses (automation, data analytics, decision support). **Stack:** FastAPI, React/TypeScript, multi-agent orchestration, RAG (RAGFlow), Ollama (local LLMs), Docker.

EDUCATION

- **Engineering Degree in Software Engineering (5 years)** Tunis, Tunisia
  Faculty of Sciences of Tunis (FST), University of Tunis El Manar *Expected: Oct. 2027*
  Coursework: data analysis, software engineering, operating systems, algorithms, artificial intelligence
- **Baccalaureate, Mathematics track – 16.25/20**
  Lycée Chadli Khaznadar *June 2022*

SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, C
Frontend: React.js, Next.js, Angular, Tailwind CSS, Material UI, Redux
Backend: Spring Boot, Spring Security (JWT), Node.js, Express.js, Flask, FastAPI, WebSockets
Databases: MySQL, PostgreSQL, SQL Server, Supabase, MongoDB, Cassandra, Neo4j
Cloud & DevOps: AWS, Docker, GitHub Actions, GitLab CI/CD, Jenkins, Nexus, SonarQube, Terraform
IA/ML: HuggingFace, Ollama, Scikit-learn, TensorFlow, PyTorch, NLP, RAG systems, Agent orchestration
Certifications: AWS Cloud Practitioner (CLF-C02), AWS AI Practitioner (AIF-C01), MOS Excel Associate (Office 2019)
Langues: English (C1), French (C1), Arabic (Native)
Interests: Esports (LoL Diamond III), Taekwondo (1st Dan, Instructor)
